PROFILE

I'm Junaid Shaukat, a passionate and dedicated student pursuing a Bachelor's degree in Computer Science at the University of Education, Lahore. With a strong interest in Full-stack development and UI/UX design, I am committed to creating seamless and engaging user experiences.

My vision is to build tools that the people needs.

EXPERIENCE

SWE Fellow @ HeadStarter AI

I am selected for SWE Fellowship of 7 weeks at Headstrater. In this fellowship I learned a lot of new things and upgrade my skills.

Projects

Revise-deps

revise-deps is a CLI tool for managing dependencies and auditing security in Node.js projects. It helps developers keep their projects' dependencies up-to-date and secure by providing commands to scan for outdated packages, check for vulnerabilities, and update packages. It has 15-50 weekly downloads on npm.

CryptoArea

Developed a dynamic crypto app showcasing real-time prices and rankings of exchanges and coins. Utilized Three.js to create a 3D Bitcoin model for the hero section, and implemented React and CoinGecko API for real-time data integration. Employed Chart.js to display data through interactive graphs, enhancing user experience and data insights

Movix

Developed a dynamic movie website using React.js and The Movie Database API. The platform provides comprehensive details about movies, including genre and cast information. Users can search for specific movies and watch trailers directly on each movie page, enhancing their browsing and viewing experience.

Shopware Ecommerce Dashboard

Developed a comprehensive e-commerce dashboard using React and Syncfusion UI components library. Integrated four versatile apps, including a text editor, color picker, Kanban board, and more. Enhanced data visualization through 6-8 different chart types, such as pie charts, to provide insightful business analytics.
